SHOE FITTING TIPS

- Do the fitting at the end of the day when your feet are the most swollen.
- Fit the shoes with the type of socks you will wear with them.
- Try first on your larger foot
- Stand up with the shoes on and walk around, the shoes should feel comfortable and your toes should not feel cramped.

THE SAFER SHOE AND BOOT

Nitti continuously ensures that – wherever you are – you feel protected from workplace and environmental hazards when you slip on our boots. Below an overview of the main features of our boots.

FOR ADDITIONAL COMFORT

A unique layered system of quality leather and Cambrelle® comfort lining ensures maximum breathability while being liquid-resistant to the external environment.

- Full grain buffalo leather
- Semi-permeable membrane for transpiration
- Cambrelle® Lining for maximum comfort
- Worker perspiration vapor migrates outward

Every Nitti Safety Shoe has an ergonomic wide tip toe cap so toes are not constricted by footwear, giving you the comfort and safety for better peace of mind.

The narrow tip toe cap causes toes to bend with pressure, restricting blood circulation in the feet.

The wider tip toe cap eases the pressure on toes without compromising safety, thereby promoting healthy feet.
