# AlcoBlow®

The AlcoBlow® is a rapid screener which detects the presence or absence of alcohol in the body. This easy-to-use, portable device is invaluable to the Police at the roadside, to an employer in the workplace or in any environment where multi-screening is a necessity.

- Easy-to-use: just 2 control buttons
- Reliable analysis in seconds
- Simple display system: result shown on a single LED
- No mouthpiece required: no physical contact
- Dual mode: active and passive

**UP TO SIX TEST PER MINUTES CAN BE ACHIEVED!**

A Worldwide Company ... For a Safer World ...

# FOR HIGH SPEED ALCOHOL TESTING **Lion** **AlcoBlow**

[www.bshop.com.sg](http://www.bshop.com.sg)

**+6585692024**

**THE FASTEST, EASIEST  
TO USE ALCOHOL TESTER EVER DEvised**

**Up to six tests per minute can be achieved!**

Very economical operation, *no disposable mouthpieces are required*. The subject simply blows into a cone at the end of the instrument.

*The test result is indicated by three coloured lights within seconds.*

## USER CONTROLS

[www.bshop.com.sg](http://www.bshop.com.sg)

[www.bshop.com.sg](http://www.bshop.com.sg)

The Lion AlcoBlow® has two push buttons and two LED indicator lights. These are clearly labelled, easy to use and protected for use under severe operational conditions.

**On/Off switch** - press and release once to switch on, then once again to switch off.

If the unit is left unused for 2 minutes it switches itself off automatically, to save battery life.

**PASSIVE switch** - This is used to obtain a breath sample when it has been observed that the subject has difficulty in blowing or is unco-operative. Simply press and release to take a sample from in front of the subject as the subject is breathing or talking normally. The PASSIVE switch can also be used to determine whether an unconscious person's breath contains alcohol by holding the AlcoBlow close to and in front of the person's mouth or nose.

**STATUS light**: has two colours:

- **red** wait
- **green** ready for breath sample. Also flashes to indicate "Low Battery"

**ALCOHOL light**: three colours show the approximate alcohol level in the breath sample:

- **green** zero (.000 - .010% BAC)
- **amber** low (.010 - .020% BAC)
- **red** high (over .020% BAC)
